First time using Tabula? Welcome!

How to Use Tabula

1. Upload a PDF file containing a data table.
2. Select the table by clicking the top left corner of a table and dragging the mouse to the bottom right corner, until all of the data is included in the shaded selection area.
3. A window will then appear containing your data. Inspect the data to make sure it looks correct. If data is missing, you may have to slightly expand your selection.
4. Click the Download button.
5. Now you can work with your data as text file or a spreadsheet rather than a PDF!
(You can open the downloaded file in Microsoft Excel or the free [LibreOffice Calc](#))

Note: Tabula only works on text-based PDFs, not scanned documents.
